COMMUNITY, FAMILY & INDIVIDUAL WELL-BEING

Individual Well-Being

Potential Years of Life Lost (PYLL)

TABLE 2: POTENTIAL YEARS OF LIFE LOST (<75 YEARS), RATES PER 1,000 PERSONS, THREE YEAR AVERAGE, 1991/93 & 1996/98 - 2003/05				
	Northwest Territories	Yellowknife	Remaining NWT Communities	Small Local Communities
1991/93	72	48	89	91
1996/98	67	41	87	82
1997/99	69	46	89	73
1998/00	72	48	96	59
1999/01	70	41	97	52
2000/02	65	42	87	44
2001/03	70	45	92	57
2002/04	68	54	80	54
2003/05	68	54	80	54

Source: Statistics Canada Vital Statistics.

Notes: Three year average PYLL rate per 1,000 persons = three year average PYLL / (three year average population / 1,000 persons).

- The three year average population for 1991/93 = (1991 population + estimated 1992 population + estimated 1993 population) / 3.
- Estimated population for 1992 = 1991 population + [(1996 population – 1991 population) / 5].
- Estimated population for 1993 follows same methodology as estimated population for 1992.

Rates are based upon 2008 population estimates.

TABLE 2.1: POTENTIAL YEARS OF LIFE LOST (<75 Years), 1991-2005

	Northwest Territories	Yellowknife	Remaining NWT Communities	Small Local Communities
1991	2,907	838	1,766	303
1992	2,760	983	1,533	244
1993	2,792	563	1,971	258
1994	2,929	1,040	1,678	211
1995	2,720	805	1,789	126
1996	3,098	751	1,977	370
1997	2,254	754	1,365	135
1998	2,918	737	1,916	265
1999	3,328	965	2,070	293
2000	2,570	797	1,759	9
2001*	2,587	387	1,943	205
2002*	2,861	1,072	1,488	227
2003*	3,326	1,035	2,054	136
2004*	2,430	961	1,247	190
2005	2,441	747	1,560	134

Source: Statistics Canada Vital Statistics.

Note: “*” means that the sum of the community types may not add to the NWT total because of deaths in the NWT that could not be attributed to a community.

Injuries

TABLE 3: DOCTOR-DIAGNOSED INJURIES & POISONINGS, AGE STANDARDIZED RATE PER 1,000 PERSONS, 1994/1995 - 2007/08				
	Northwest Territories	Yellowknife	Remaining NWT Communities	Small Local Communities
1994/95	271	322	249	179
1995/96	270	315	249	185
1996/97	261	311	233	179
1997/98	250	289	231	162
1998/99	247	292	222	163
1999/00	231	272	207	157
2000/01	228	269	206	151
2001/02	210	238	196	146
2002/03	203	228	191	149
2003/04	195	213	193	113
2004/05	202	213	201	152
2005/06	212	220	213	153
2006/07	203	217	201	146
2007/08	211	207	228	147

Sources: Department of Health and Social Services, *Medicare* and NWT Bureau of Statistics.

Notes: These numbers are estimates subject to future revisions due to record revisions, data entry delays and database design changes.

N'dilo and Detah numbers are included in Yellowknife, as separate postal codes do not exist for each community.

Numbers include physician diagnosed injuries and poisonings regardless of location (clinic, hospital or other location).

Some individuals may be diagnosed more than once for the same injury or poisoning.

1994/95 and 1995/96 rates are calculated using estimated population for 1994 and 1995.

- Estimated 1992 population = 1991 population + average annual population growth.
- Average annual population growth = [(1996 population – 1991 population) / 5].
- Estimated 1994 and 1995 population follows same methodology as estimated 1992 population.

TABLE 3.1: DOCTOR-DIAGNOSED INJURIES AND POISONINGS, 1994/95 - 2007/08

2005/06	Nr	..	303	258
2006/07	Nr	..	310	241

Sources: Department of Health and Social Services, *Health Suite* and NWT Bureau of Statistics.

Notes: "nr" means not relevant.

".." means data is not available.

These numbers are estimates subject to future revisions due to record revisions, data entry delays and database design changes.

Yellowknife residents (including N'dilo and Detah) are not reported as they are generally diagnosed at Stanton's emergency department (by physicians).

Remaining NWT Communities excludes residents of communities served by local physicians at hospitals (Hay River, Hay River Reserve, Enterprise, Fort Smith and Inuvik).

Age-standardized rate for the NWT is not relevant. Most NWT residents would have most of their injuries diagnosed by local physicians - usually at a hospital.

A new community health information system was implemented as of April 1, 2000. Previous data are not comparable due to changes in data collection.

Numbers primarily include nurse diagnosed injuries and poisonings at health centres.

In some cases an individual may have been treated more than once for the same injury or poisoning.

TABLE 4.1: NURSE-DIAGNOSED INJURIES & POISONINGS, 2000/01 - 2006/07

2005/06	4,039	..	3,008	836	60	85	546	24	121
2006/07	4,056	..	3,079	791	59	128	449	23	132

Source: Department of Health and Social Services, *Health Suite*.

Notes: ".." means data is not available.

These numbers are estimates subject to future revisions due to record revisions, data entry delays and database design changes.

Yellowknife residents (including N'dilo and Detah) are not reported as they are generally diagnosed at Stanton's emergency department (by physicians).

Remaining NWT communities excludes residents of communities served by local physicians, usually at hospitals (Hay River, Hay River Reserve, Enterprise, Fort Smith and Inuvik). However, these residents are included in the NWT total. A new community health information system was implemented as of April 1, 2000. Previous data are not comparable due to changes in data collection.

Numbers primarily include nurse diagnosed injuries and poisonings at health centres.

In some cases, an individual may have been treated more than once for the same injury or poisoning.

Suicides

TABLE 5: THREE YEAR AVERAGE NUMBER OF SUICIDES, RATE PER 10,000 PERSONS, 1992/94 & 1996/98 - 2003/05					
	Canada	Northwest Territories	Yellowknife	Remaining NWT Communities	Small Local Communities
1992/94	1.3	1.3	1.2	1.2	2.4
1996/98	1.3	1.4	0.4	2.3	1.1
1997/99	1.3	2.3	1.1	3.5	1.1
1998/00	1.2	2.4	1.5	3.3	1.1
1999/01	1.2	2.5	1.1	3.9	1.0
2000/02	1.2	1.9	1.1	2.7	1.0
2001/03	1.2	2.1	1.1	3.0	2.0
2002/04	1.2	2.3	2.1	2.5	1.9
2003/05	..	2.0	1.6	2.3	1.9

Source: Statistics Canada Vital Statistics.

Notes: “..” means data is not available.

Three year average suicide rate per 10,000 persons = three year average suicides / (three year average population / 10,000 persons).

- The three year average population for 1992/94 = (estimated 1992 population + estimated 1993 population + estimated 1994 population) / 3.
- Estimated population for 1992 = 1991 population + [(1996 population – 1991 population) / 5].
- Estimated population for 1993 and 1994 follows same methodology as estimated population for 1992.

Notes: ".." means data is not available.

"-" means data is 0 or has been suppressed to protect privacy.

Three year average teen birth rate per 1,000 females aged 15 to 19 = three year average births to females 19 or younger / (three year average population of females aged 15 to 19 / 1,000). E.g.:

- Three year average population of females aged 15 to 19 for 1992/94 = (estimated 1992 population of females aged 15 to 19 + estimated 1993 population of females aged 15 to 19 + estimated 1994 population of females aged 15 to 19) / 3.
- Estimated population of females aged 15 to 19 for 1992 = 1991 population of females aged 15 to 19 + [(1996/98 population of females aged 15 to 19 – 1991 population of females aged 15 to 19) / 5].
- 1996/98 population of females aged 15 to 19 = (3 year average births to females aged 19 or younger * 1,000) / 3 year average birth rate per 1,000 females aged 15 to 19.

Sources: Department of Health and Social Services Administrative Records and *Child and Family Information System (CFIS)*.

Notes: ".." means data unavailable.

"-" means data, where cell values are less than five, have been suppressed to protect privacy.

These numbers are subject to future revisions due to record revisions, data entry delays and database design changes.

Data unavailable for the Northwest Territories total or the Remaining NWT Communities in 1999/00.

N'dilo and Detah data are included in Yellowknife, as residency for children in these communities is often noted as Yellowknife by child welfare workers. Numbers may have increased since the late 1990s due to the impact of the new Children and Family Services Act (in force October 1998). The new Act created a plan of care agreement as a new way to provide services to children.

TABLE 9.1: CHILDREN RECEIVING SERVICES, 1993/94 - 2007/08

Notes: Under the plan of care agreement, children could still be living in their parents' home but are receiving services from the Department of Health and Social Services. An equivalent category to 'a plan of care agreement' did not exist under the previous Act. Since the new Act came into force, parents have been more inclined to seek services for their children, or family, now that they do not have to automatically give up parental rights. The vast majority of the increase in children receiving services has been from children who are living at home. And, of these children receiving services in their homes, most service arrangements originated through voluntary agreements as opposed to court orders.

2006/07	547	296	251	6,038
2007/08	409	226	183	6,458

Source: Department of Health and Social Services, *Family Violence Database*.

Notes: These numbers are subject to future revisions due to record revisions, data entry delays and database design changes. Data for Tuktoyaktuk were unavailable for 2002/03 to 2006/07, and has been estimated based on an average of the previous three years. Fort Smith shelter data were not included for 2004/05 as it was not in operation for most of that year. NWT data are based on shelter and not community of residence. Some admissions may be from non-NWT residents. NWT residents seen in non-NWT shelters are not included in the above statistics.

Sources: 1989, 1994 and 1999 NWT Labour Force Survey; 2004 NWT Community Survey; 1991, 1996, 2001 and 2006 Statistics Canada Census.

Notes: ".." means data is not available.

Comparisons between the labour force survey (LFS) completed by the Bureau of Statistics and the Census should be done with caution. The LFS and NWT Community Survey are completed during the January-March period. The Census is done in May and June. Census indicators are often higher due to seasonal employment activities.

The Monthly Labour Force Survey completed by Statistics Canada only reports community-level data for Yellowknife.
