Available Areas for Expression of Interest within the Central Mackenzie Valley 2018

The purpose of this map is to provide a visual representation of areas within the Central Mackenzie Valley that have been identified for expression of interest. The map is intended to support decision-making processes related to resource development and land use planning.

Introduction

The map is based on data provided by the Government of Northwest Territories and other relevant stakeholders. The areas marked on the map are considered to have potential for various resource activities, including oil and gas, mining, and renewable energy projects.

Methodology

The map was created using a combination of remote sensing data and ground-based surveys. The areas marked on the map are considered to have potential for various resource activities, including oil and gas, mining, and renewable energy projects.

Table 1: Potential Rating Criteria

<table>
<thead>
<tr>
<th>Potential Rating</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>Suitable for exploration and development. Moderate to high potential for resource activity.</td>
</tr>
<tr>
<td>Moderate</td>
<td>Moderate potential for resource activity.</td>
</tr>
<tr>
<td>Low</td>
<td>Low potential for resource activity.</td>
</tr>
</tbody>
</table>

The Map

The map illustrates the locations within the Central Mackenzie Valley that have been identified for expression of interest. The areas marked on the map are considered to have potential for various resource activities, including oil and gas, mining, and renewable energy projects.

The map is intended to support decision-making processes related to resource development and land use planning.

Oil and Gas Rights and Grid References

The map is based on data provided by the Government of Northwest Territories and other relevant stakeholders. The areas marked on the map are considered to have potential for various resource activities, including oil and gas, mining, and renewable energy projects.

The map is intended to support decision-making processes related to resource development and land use planning.
